

– Wytron Hard Drive Duplicators –

= The Best products you can find all over the world =

★ *Mass – production type:*

TA-2000 : 14 – target Pure SATA Bus Hard Drive Duplicator ; IDE option

TA-2200 : 14 – target Pure SATA Bus Hard Drive Duplicator ; Hot-Sway type

★ *Medium – production type:*

DD-7000 : 5 – target IDE Bus Hard Drive Duplicator ; SATA option

DD-6000 : 5 – target SCSI-II Bus Hard Drive Duplicator

★ *Small – volume type:*

DD-218 : Quad - Bus Hard Drive Duplicator; IDE/SATA: 2 – target; SCSI/USB: 1 – target

DD-221 : 2 – target IDE/SATA Dual - Bus Hard Drive Duplicator

Common features for all lines of product

Professional industrial design, non-PC structure

Many facilities using PC structure as their controller but fail to have good reliability and robust mechanism. Only with Wytron's dedicated controller board will provide sufficient capability to setup the machine with best performance and yet, the best quality with long-term expectancy.

Functionality to meet different customers' need

Through intelligent detection by well programming on Wytron's HDD duplicators, users can copy their hard drives with only necessary data area to accomplish the duplication task, no need to copy entire capacity of master hard drive, save at least 90% of elapsed time. Moreover, copy onto different targets or bunch of different targets mixing operation can be done without trouble.

Fastest hardware specification compliance

All Wytron's HDD duplicators are designed with latest technique to reach the best and fast performance in order to reach the ultimate cost-efficiency.

Power auto-control for safer operation

With thoughtful consideration of protecting media drives connected, Wytron makes her products output the power to media drives in operation only. When operation is finished, power will be cut off automatically during connecting and disconnecting of media drives from machine. Thus the safety of drives themselves can be secured.

Firmware upgradable to suit future's requirement

All Wytron's HDD duplicators are not only built for present usage but to suit the need for future since the high development and unpredictability for PC industry. Only to modify the BIOS for duplicators continuously can guarantee the customers' investment by long-term availability. Firmware for all Wytron's HDD duplicators can be promoted with latest version easily by users themselves.

Durable structure to ensure the long-term usage

All Wytron's HDD duplicators are built to be strong and robust so as to have longest servicing period than ever.

Specification

MODEL	TA-2000	TA-2200	DD-7000
Picture			
Bus / Target	SATA / 14 targets	SATA / 14 targets	IDE / 5 targets
Bandwidth	9 GB / Minute	9 GB / Minute	6 GB / Minute
Power Supply	500W / 115V or 230V Switch	500W / 115V or 230V Switch	365W / 115V or 230V Switch
1.8"/2.5"/3.5"	Option / Yes / Yes	No / Option / Yes	Option / Yes / Yes
Expansibility	Via SATA3 to IDE, Via adapter to miniSATA	Via 3.5" to 2.5" housing adapter to SATA 2.5"	Via SATA1H to SATA, Via ZF40H(T) to ZIF PATA
OS / FS Compatibility	Windows, Mac, Linux, etc., FAT16/32,NTFS, HFS, EXT2/3	Windows, Mac, Linux, etc., FAT16/32,NTFS, HFS, EXT2/3	Windows, Mac, Linux, etc., FAT16/32,NTFS, HFS, EXT2/3
Packing dim.	630 x 370 x 400 x 14.5 Kgs	560 x 550 x 540 x 22 Kgs	520 x 430 x 300 x 10 Kgs
